

Special Issue

Progress in Food Processing

Message from the Guest Editor

Progress in food processing enables the food industry to create products with special characteristics and increases the availability of various forms of food products. Many scientists are focusing on the development of new functional products with health promoting properties. The broad spectrum of products needed for meeting consumer requirements and the increasing world population necessitates the introduction of new technologies with improved energy efficiency, water savings, and the use food industry by-products. This Special Issue is focused on all aspects of progress in food processing and especially gathers experimental, theoretical, and computational research on new processes development or processes improvement in this field. Chemical and biochemical reaction processes, mass transfer, grinding, separation and purification processes, nanotechnology in food processes, heat transfer systems, mixing and fluid processes, integrated process design and scale-up, process modelling, simulation, optimization, and control are all topics that may be included in this Issue. Review papers concerning advances in food processing are also welcome.

Guest Editor

Prof. Dr. Dariusz Dziki

Department of Thermal Technology and Food Process Engineering,

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
