Protein Biosynthesis and Drug Design & Delivery Processes

Message from the Guest Editor

From the initial, epoch-making work of Bruce Merrifield and solid-phase peptide synthesis, the era of protein biosynthesis, along with drug-delivery and processes, has come a long way. Having mastered methods to introduce unnatural amino acids, and moieties of interest into protein chains, we are now firmly in the era of biologicals. Matching these efforts and surpassing them will enable us to make inroads into drug-design and delivery processes. While in silico computational approaches remain the mainstay of the drug development pipeline, novel delivery systems embrace nanotechnology to enhance delivery efficacy and specificity. In this Special Issue, we cover advances in protein biosynthesis, drug-design, and delivery processes and remark on the future of these arenas.

Guest Editor

Prof. Dr. Mahesh Narayan

Department of Chemistry and Biochemistry, University of Texas at El Paso (UTEP), El Paso, TX 79968, USA

Deadline for manuscript submissions

closed (25 January 2024)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
