Special Issue

Applied Thermodynamics in Chemical Engineering

Message from the Guest Editors

Our aim is to present advances in experimental methods and theoretical approaches for electrolytic systems that yield new measurement techniques, experimental data or modeling for different applications.

- electrolytes
- aqueous solutions
- mixed electrolytes
- thermodynamic models
- osmotic coefficients
- activity coefficients
- solubility
- water activity
- hydration
- phase diagram
- pitzer models
- phosphate fertilizers

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
