Current Trends in Food and Food Byproducts Processing

Message from the Guest Editor

This Special Issue aims to collect recent advances in current trends in food processing and especially experimental, theoretical, and computational research on current trends in the development and improvement of food processes. Chemical and biochemical reaction processes, mass transfer, grinding, drying, separation and purification processes, nanotechnology in food processes, heat transfer systems, mixing and fluid processes, integrated process design and scale-up, process modeling, simulation, optimization, food control, and food quality are all topics that may be included in this issue. Both original research papers and reviews are invited to expand knowledge on current trends in food and food byproduct processing.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
