

Special Issue

Numerical Modeling and Optimization of Fluid Flow in Engines

Message from the Guest Editors

This Special Issue “Numerical Modeling and Optimization of Fluid Flow in Engines” of *Processes* covers research on the numerical modeling and optimization of fluid flow in engines. Research topics include, but are not limited to, aeroengines, ramjets, scramjets, variable cycle engines, precooled engines, RBCCs, and TBCCs. The research includes internal flow mechanisms, data-driven modeling aerodynamics, and flow control of the engines.

Guest Editors

Dr. Ziao Wang

Dr. Chengkun Lv

Dr. Nan Li

Deadline for manuscript submissions

5 February 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
