# **Special Issue**

### Microencapsulation of Food Antioxidants

### Message from the Guest Editors

A huge challenge that still hinders the potential of food antioxidants is their sensitivity and degradation under harsh environmental conditions, such as high temperatures and changes in pH, oxygen, and enzyme activity. Microencapsulation provides an innovative and sustainable means with which to preserve food antioxidants and their biological activities, as well as promote their diversified uses. This Special Issue aims to explore current advancements in the microencapsulation and application of food antioxidants in foods such as cereals, fats and oils, beverages, fruits and vegetables, meat products, dairy products, food packaging, etc. We would like to invite researchers to contribute to this Special Issue by submitting original research articles, reviews, and perspectives focusing on, but not limited to, the following areas:

- Development and characterization of microcapsules.
- Efficacy of encapsulation materials and techniques.
- Novel encapsulation techniques and wall materials.
- Application of microcapsules to various foods.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
