Experimentation, Optimization and Simulation of Drying Processes of Agricultural Food Products and Materials

Message from the Guest Editors

We would like to invite you to contribute to our Special Issue 'Experimentation, Optimization and Simulation of Drying Processes of Agricultural Food Products and Materials'. This Special Issue will provide an in-depth understanding of the complexities and computational solutions of the drying processes of agricultural food products and materials. The use of models or simulations is the most popular way to sound engineering decisions concerning new process concepts involved in drying processes to achieve optimal energy utilization, environmental protection, and quality improvement of dried products for consumer acceptability, food sustainability, security, and prolonged storage periods.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
