

Special Issue

Advances in Remediation of Contaminated Sites: Volume I

Message from the Guest Editors

To meet the production and development needs of society, land resources have been synchronously damaged and polluted to certain extents due to human activity. As land resources are non-renewable, developing land restoration and improvement approaches with efficiency is an important approach for achieving the sustainable development of human society. Site remediation technology has developed rapidly in recent years and has brought hope for land remediation.

This Special Issue “[New Advances in Remediation Technology of Contaminated Sites](#)” aims to collect the latest progress in contaminated site remediation, in order to help solve the new bottleneck in the development of site remediation technology. Topics of interest include but are not limited to:

- Survey and assessment of contaminated sites
- Environmental processes and effects of pollutants
- Remediation technology and its application in contaminated sites
- Remediation strategy and management in contaminated sites

Guest Editors

Prof. Dr. Guining Lu

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
