

Special Issue

Feature Review Papers in Section "Food Processes"

Message from the Guest Editor

The progress in food processing is a very important issue. Modern food processing technology has to deal with many challenges such as increasing world population, changing consumer preferences, and changes in the quality of raw materials as a result of climate change. Such aspects as water and energy saving, waste management and cleaner production are also very important. This Special Issue is focused on review papers concerning advances in food processing. Research areas may include: progress in mass transfer, size reduction, separation and purification processes, nanotechnology in food processing, heat and transfer systems, mixing and fluid processes, integrated process design and scale-up, process modeling, simulation, optimization, and control. Moreover, technologies that relate to cost savings, environmental improvement and enhanced final product quality may be also included in this issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
