Recent Advances in High-Efficient Separation Methods for the Analysis of Chemical and Biological Samples

Message from the Guest Editors

The highly efficient separation of chemical and biological species is vital in various fields, including, but not limited to, the analysis of biological, environmental, food, forensic, petrochemical, and pharmaceutical samples. This Special Issue of *Processes*, entitled "Recent Advances in High Efficient Separation Methods for the Analysis of Chemical and Biological Samples", aims to publish high-quality research pertaining to the development of efficient sample preparation and high-resolution separation methods. Reviews as well as original research articles related to the sample preparation and separation of challenging samples are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
