Special Issue

Systematic Design, Testing and Development of In Vitro Diagnostic Instruments

Message from the Guest Editors

This Special Issue on "Systematic Design, Testing and Development of in Vitro Diagnostic Instruments" aims to gather outstanding research and comprehensive coverage of all aspects related to the design, testing and development technologies of in vitro diagnostic instruments, covering a wide range of multi-domain methods to improve the intelligence and overall performance of in vitro diagnostic instruments. This Special Issue will bring together high-quality research articles on different aspects of systematic design, testing and development technologies of in vitro diagnostic instruments, including the current status and remaining challenges. Topics include, but are not limited to:

- Systematic design theories and methods of in vitro diagnostic instruments;
- Test standards, procedures and methods of in vitro diagnostic instruments;
- Software and hardware integrated development methods of in vitro diagnostic instruments.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
