

Special Issue

Metal Oxides and Their Composites for Photocatalytic Degradation

Message from the Guest Editors

This Special Issue will focus on the recent developments in metal oxides and their composite photocatalysts for wastewater treatment, as well as their reaction mechanisms. Submissions in the form of both original research articles and reviews are welcome on topics encompassing the design of novel materials and the development of new synthetic routes for applications in photocatalytic pollutant degradation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
