

Special Issue

Thermodynamics: Modeling and Simulation

Message from the Guest Editors

In this Special Issue, “Thermodynamics: Simulation and Modeling”, we highlight and celebrate the latest developments in thermodynamics research. Topics include but are not limited to the following:

- Thermodynamic models for process modeling, simulation, optimization, and control: equations of state, excess Gibbs free energy models, and related methods;
- Property prediction for early stage process development and design: molecular simulation, electronic structure calculations, and group-contribution methods;
- Molecular thermodynamics for process intensification.

We welcome contributions in the form of full-length articles, short communications, and reviews.

Guest Editors

Dr. Andrew S. Paluch

Department of Chemical, Paper, and Biomedical Engineering, Miami University, 64 Engineering Building 650 E High Street, Oxford, OH 45056, USA

Dr. Juan Carlos Araque

School of Engineering, Benedictine College, Atchison, KS, USA

Deadline for manuscript submissions

closed (30 March 2022)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
