

## Special Issue

# Emerging Trends in the Wine Ageing Process

### Message from the Guest Editor

This Special Issue will focus on the wine ageing process: a crucial phase during which the wine's identity is fine-tuned. The aim is to collect original contributions as well as systematic reviews which cover new findings related to the traditional wine ageing process in casks and/or alternative technological solutions, accelerating ageing processes, the impact of wine cellar environments, the bottle ageing process, and unconventional wine ageing processes. We welcome papers that focus on the assessment of physicochemical and wine sensory properties, consumer evaluations, and new methodologies to control the ageing process. Studies on these topics but focusing on distilled drinks are also welcomed. Accordingly, we hope that this Special Issue will allow authors to share their results and will provide readers with an opportunity to obtain more information concerning the recent findings related to the wine ageing process.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto  
Department of Drug Science and Technology, University of Turin, Via P.  
Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
