Plasma Processing: Latest Advances and Prospects

Message from the Guest Editor

This Special Issue titled “Plasma Processing: Latest Advances and Prospects” seeks to highlight the most recent developments and future opportunities in the field of plasma processing. Plasma processing has emerged as a crucial technology with significant impacts on various sectors, including materials science, electronics, food, and environmental engineering. This Special Issue will cover innovative techniques and enhanced processes that push the boundaries of efficiency, precision, and sustainability in applications such as surface modification, thin film deposition, food processing, and environmental protection. By bringing together cutting-edge research and practical insights, this Special Issue aims to provide a comprehensive overview of the current state of plasma processing and its prospective advancements. Researchers and practitioners are invited to contribute their findings, emphasizing both theoretical frameworks and practical implementations, to showcase the transformative potential of plasma technologies in industrial and scientific domains.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
