

Special Issue

Unconventional Oil and Gas Reservoirs Seepage Theory, Numerical Simulation and Application Technology

Message from the Guest Editors

This Special Issue on “Unconventional Oil and Gas Reservoirs” aims to collect excellent research related to the development of unconventional oil and gas reservoirs. The topics of this Special Issue include but are not limited to:

- Experiments on multiphase flow;
- Pore-throat structure evaluation and permeability measurement;
- Fracture propagation modeling and fracture characterization;
- Porous media flow theory and methods;
- Advances in unconventional reservoir simulation;
- Intelligent production modeling and prediction;
- Improved and enhanced unconventional oil and gas recovery;
- Technological innovations in unconventional hydrocarbon extraction;
- Other unconventional hydrocarbon developments.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
