

Special Issue

The Advances in Food Processing and Functional Food

Message from the Guest Editors

With changes in the global environmental scenario, the importance of food science in the search for technological alternatives that optimize food production on a global scale is highlighted. Emerging technologies that change food processing in order to improve the use of inputs, water consumption, and carbon dioxide equivalent emissions, as well as leading to improvements in nutrient profiles, antioxidants, phenolic compounds, redox responses, sensory acceptance, and shelf life are more necessary than ever. This Special Issue, "The Advances in Food Processing and Functional Food", seeks to curate new studies that use food science to model food processing in its entire context, with the aim of presenting new processing alternatives, new products, or even analyses and improvements of existing processes.

Guest Editors

Prof. Dr. Bernardo Romão
Prof. Dr. Verônica Cortez Ginani
Dr. António Raposo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
