Recent Advances in Application of Silver Nanoparticles in Biochemistry

Message from the Guest Editors

This Special Issue on “Recent Advances in Application of Silver Nanoparticles in Biochemistry” aims to cover recent advances in the application of silver nanoparticles in various fields of bioscience. Topics include but are not limited to methods and/or applications in the following areas:

- Synthesis and characterization of silver nanoparticles;
- Silver nanoparticles in the management of plant diseases and agricultural applications;
- Silver nanoparticles and multidrug-resistant bacterial species;
- Silver nanoparticles and human health;
- Cytotoxicity of silver nanoparticles;
- Silver nanoparticles in neurodevelopment and neurodegeneration.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
