

Special Issue

Processes Development for Wastewater Treatment

Message from the Guest Editor

We are pleased to announce the Special Issue “Processes Development for Wastewater Treatment”, to be published in the *Processes* journal. This issue aims to showcase cutting-edge advancements in wastewater treatment technologies and explore various aspects of wastewater management. Topics will include treatment technologies, water reuse, biosolid production and management, water quality, regulatory frameworks, economic considerations, public acceptance, risk assessment, benefits, success factors, and key challenges. The Special Issue will also address various water reuse applications, such as agricultural and landscape irrigation, urban and industrial uses, environmental enhancement, groundwater aquifer artificial recharge, and both indirect and direct potable reuse. Additionally, it will cover innovative technologies and practices for sewage biosolid production and utilization, including issues related to contaminants in biosolids, land application, composting, energy potential, and physico-chemical properties. We invite you to contribute to this Special Issue by sharing your research and insights on water recycling and reuse.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
