

Special Issue

Advanced Battery Material Design and Process

Message from the Guest Editors

Lithium-ion batteries are used on a large scale in electronic devices and electric vehicles for their high energy density and long cycle. In the background of carbon neutrality, electric vehicles will gradually replace fuel cars, and lithium-ion/sodium-ion battery scale energy storage will also be used in wind and solar green energy in large energy storage. Here, for the current lithium-ion battery's high energy density and long cycle, we initiated this Special Issue on advanced battery material design and process. The content can include new battery electrode materials, battery design and battery coating and assembly processes.

Guest Editors

Prof. Dr. Karim Zaghib

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
