

## Special Issue

# Wastewater Treatment: Control, Removal and Separation Processes

### Message from the Guest Editors

The Special Issue “Wastewater Treatment: Control, Removal and Separation Processes” is currently open to submissions of original, high-quality research and review articles on modern biological, chemical and physical technologies used in wastewater treatment and management. Potential topics include (but are not limited to):

- Emerging contaminant identification and treatment.
- Resource recovery from wastewater.
- Advanced oxidation processes for wastewater treatment.
- Biological wastewater treatment.
- Advanced membrane technologies in wastewater treatment.
- Adsorption removal of pollutant from wastewater.
- Smart recycling and water reuse.
- Nanotechnologies applications in wastewater treatment.
- Application of machine learning for wastewater industries.
- Coagulation and electrocoagulation of wastewater.
- Electrochemical and bio-electrochemical treatment of wastewater.
- Integrated system in treating wastewater.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
