

Special Issue

Numerical Simulation and Heat Transfer in Material Processing and Casting Engineering

Message from the Guest Editors

In light of the development of new processors and increasingly advanced computing capacity, numerical simulation tools have provided increased support for various areas of engineering. However, they are now a necessary tool for improving and optimizing processes. For this reason, *Processes* launched this Special Issue, Numerical Simulation and Heat Transfer in Material Processing and Casting Engineering, to showcase to the scientific community advances in manufacturing processes involving different heat transfer mechanisms. This Special Issue will focus on heat transfer processes in furnaces and reactors, steel manufacturing processes, ladle metallurgy, continuous casting, pyrometallurgy, continuous casting, reheating furnaces, heat treatment, boiling curves, etc.

Guest Editors

Dr. Constantin Alberto Hernández Bocanegra

Dr. José Ángel Ramos-Banderas

Prof. Dr. Gildardo Solorio Diaz

Deadline for manuscript submissions

20 September 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
