

## Special Issue

# Water Quality Modelling

### Message from the Guest Editor

From an historical perspective, water quality modeling and management paradigms have evolved over the past several decades as our understanding of water quality issues and their environmental and human health effects have become clear. At this time, we cannot say that we fully understand all water quality issues and the consequences of water quality problems. This Special Issue of the *Processes* journal will gather and present recent research activity within this broad research area with emphasis on water quality modeling. We are looking forward to receiving your contributions to this field.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
