# Security Intelligent Monitoring and Big Data Utilization in Coal Mining Process

### Message from the Guest Editors

This Special Issue aims to develop security intelligent monitoring and big data utilization theories and technologies in the coal mining process. The topics of interest for this Special Issue include, but are not limited to, the following:

- Novel field monitoring theories and engineering applications in mining;
- Monitoring system optimization and improvement;
- Monitoring data processing and analysis;
- Prediction of mining disasters based on data-driven methods.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
