New Research on Transition Metal Catalysis and Green Synthesis

Message from the Guest Editors

This Special Issue on “New Research on Transition Metal Catalysis and Green Synthesis” seeks high quality studies focusing on the latest reactions of transition metal catalysis and green synthesis. Topics include, but are not limited to:

- Transition metal-catalyzed C-H functionalization;
- Transition metal-catalyzed cross-coupling and cyclization;
- Metal-free synthesis of important organic molecules;
- Transformation employing H₂O as solvent.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
