

Special Issue

Advances in Coal Gasification Process and Technology Development

Message from the Guest Editors

Dear Colleagues This Special Issue, entitled “Advances in the Coal Gasification Process and Technology Development”, aims to gather outstanding research that addresses advances in the coal gasification process and its technology. It will cover a wide range of processes applicable to coal gasification, employing a variety of resources and technologies in both economically and environmentally friendly ways. This Special Issue will collate high-quality research articles on various aspects of coal gasification process technology, including its current status and remaining challenges. Topics include, but not are limited to, the following:

- Advanced coal gasification process technology, including underground gasification, catalytic gasification, hydrogasification, supercritical water gasification and plasma gasification.
- Simulations and experiments for advanced coal gasification technology.
- Design for the advanced coal gasification process.
- Evaluation of the energy efficiency and economic benefits of the coal gasification process

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
