

Special Issue

Circular Economy and Efficient Use of Resources (Volume II)

Message from the Guest Editors

Previous and current resource-use models have led to high levels of pollution, environmental degradation, and the depletion of natural resources. The waste policy has a long history and has traditionally focused on more environmentally sustainable waste-management techniques. To be efficient in terms of resource use, the principles of the circular economy should change this trend, transforming the economy into a more sustainable economy. The new waste regulations have introduced novel waste-management objectives in terms of waste prevention, reuse, recycling, and storage, by addressing new processes. In the current Special Issue on the "Circular Economy and Efficient Use of Resources (Volume II)", we invite researchers to publish their scientific contributions to this topic.

Guest Editors

Prof. Dr. Lucian-Ionel Cioca

Industrial Engineering and Management Department, Faculty of Engineering, Lucian Blaga University of Sibiu, 10 Victoriei Blv., 550024 Sibiu, Romania

Dr. Elena Simina Lakatos

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
