Interfacial Structure-Mediated Controllable Adhesion and Assembly

Message from the Guest Editors

This Special Issue on "Interfacial Structure-Mediated Controllable Adhesion and Assembly" aims to provide a detailed understanding of the current status and prospects of this field. It includes, but is not limited to, the following aspects:

- Development of novel interfacial structure manufacturing approaches;
- Surfaces with controllable wettabilities, including liquid-repellent surfaces;
- Adhesive, bioadhesive, and anti-bioadhesion materials;
- Interface-mediated supramolecular assembly;
- Supraparticle fabrication mediated by interfaces or surfaces.

I am pleased to invite you to submit a manuscript to this Special Issue, where we welcome original research papers and reviews on topical areas.

Guest Editors

Dr. Wendong Liu

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
