

Special Issue

Extraction, Exploitation and Application of Algae Biomass

Message from the Guest Editors

This special issue on “Extraction, Exploitation and Application of Algae Biomass” seeks high quality works focusing on the latest novel advances related to algae production, biomass processed and industrial developments. Topics include, but are not limited to:

- Algae species and strains selection, characterization and potential applications;
- Cultivation improvements: biological and technical approaches;
- Bioremediation processes and circular economy by using algae;
- Algae as climate change mitigation tools;
- Developments on downstream processes and biorefinery;
- Applications and future possibilities
- The Nagoya protocol and the access and use of algae genetic resources

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
