Special Issue

Animal Models for Diabetes

Message from the Guest Editor

This Special Issue, "Animal Models for Diabetes", aims to assemble the most advanced knowledge on the new approaches to modeling diabetes and high-glucose conditions. This issue's scope is not limited to models in research animals, and submissions of in vitro, 3D culture, microfluidics, and tissue organoid models of diabetes and its aspects are equally encouraged. We welcome models that can provide insights into molecular events and signaling pathways and their role in diabetes-associated pathologies, as well as models that can lead to new translational discoveries and direct therapeutic approaches to the diverse complications of diabetes. These manuscripts may include research articles and reviews.

Guest Editor

Dr. Anton Lennikov

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
