

Special Issue

Upstream and Downstream Processing of Biogas: From Production Technology to Performance Assessment

Message from the Guest Editors

As a matter of fact, today the high investment costs and the low price of fossil fuels limit the spread of biogas technology. But, the development of more efficient production methods and adequate support policies can help to overcome these obstacles. For these reasons, this special issue wants to focus on:

- Upstream and downstream processing innovations: new energy crops, anaerobic digestion enhancements, exploitation of biogas as a fuel (ORC systems, fuel cells, biomethane)
- Environmental sustainability evaluation by means of multidisciplinary impact analyses.
- Health and Environmental impact assessments: evaluations of the damage caused by biogas production plants and by combustion in engines, gas turbines or other devices and effects on emissions regulations.

Guest Editors

Prof. Dr. Alarico Macor
Dr. Alberto Benato
Dr. Andrea Pezzuolo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
