Special Issue

Bioprocess Design and Optimization

Message from the Guest Editors

This Special Issue on "Bioprocess Design and
Optimization" intends to present novel examples of
process design and optimization for all bioprocesses.
Topics include but are not limited to:

- Biomass conversion (chemical- or enzymatical
  reaction, or fermentation);
- Biomass utilization (2nd, 3rd, and 4th generation);
- Bioprocess design;
- Process optimization by statistical methodologies;
- Treatment of biomass such as extraction,
  pretreatment, or saccharification.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
