# Applications of Biosorption in Wastewater Treatment

### Message from the Guest Editor

This Special Issue on “Applications of Biosorption in Wastewater Treatment” aims to assess recent trends, new developments, and applications in biosorption. The contents of this Special Issue may cover the use and characterization of new biosorbents (dead biomass or living biomass) that demonstrate superior effectiveness to others already described or in use, including the possible use of biopolymers for this purpose. It could also cover the use of immobilized cells in real biosorption processes and biosorption in municipal wastewater treatment, with special attention to its actual application, either as a single treatment or as a combined treatment.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
