Biological Treatment of Industrial Wastewaters: Challenges and Advances

Message from the Guest Editor

Industrial wastewater generally has a complex chemical composition, requiring robust and effective treatment processes before being discharged into the environment.

Several approaches can be used for the treatment of industrial waste streams, such as physicochemical, biological, and advanced oxidation processes. In most applications, the best solution is a combination of several techniques in order to achieve greater treatment efficiency and cost reductions. However, selecting the best technically and economically viable solution is always a challenge.

For this Special Issue, we welcome high-quality studies on the treatment of industrial wastewater by conventional and advanced methods. Works involving combinations of processes are preferred. Besides technical reports, survey papers and reviews are also welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
