

## Special Issue

# Recent Advances in Catalysis by Transition Metals

### Message from the Guest Editors

This Special Issue collects original research papers or reviews focused on catalysis by transition metals. This Special Issue aims to cover recent progress and advances in designing new catalysts (with an improved activity or selectivity compared to existing ones), developing catalytic transformations towards valuable molecules or materials (with a reduced number of steps or milder conditions than previously described) or improving catalytic processes (greener conditions, recyclability, etc.) Topics include but are not limited to:

- Synthesis and characterization of new transition metal complexes with enhanced catalytic properties;
- Investigations on heterogeneous catalysis with transition metals;
- Preparation of transition metal nanoparticles for catalytic transformations;
- Development of new catalytic transformations;
- Use of catalytic processes for the synthesis of important building blocks, valuable molecules or materials;
- Transition metal catalysis as a powerful tool for green chemistry.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
