Synthesis, Application and Biological Evaluation of Chemical Organic Compounds

Message from the Guest Editors

With this Special Issue on “Synthesis, Application and Biological Evaluation of Chemical Organic Compounds”, we aim to attract original research articles and review papers that cover research on the synthesis of new organic molecules using newly developed or known synthetic procedures, the evaluation of their biological evaluation, and their application. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The development of new procedures for the obtainment of organic compounds;
- The synthesis of new organic molecules;
- The synthesis of hybrid molecules;
- The synthesis and biological evaluation of new molecules;
- In silico, in vitro, and in vivo biological evaluation of new and/or known organic compounds.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
