Electrolysis Processes

Message from the Guest Editor

This Special Issue of *Processes* invites contributions covering all electrochemical technologies supporting the transition from fossil to renewable energies and/or raw materials. Our special focus is on water and CO₂ electrolysis. We encourage further contributions on novel electroenzymatic and microbial processes. Both experimental and modeling works providing new insights into the operation of electrochemical reactors under dynamic conditions, including aspects of catalyst and component aging (membranes, current collectors), as well as productivity and selectivity issues are highly welcome. The contributions can be regular papers, reviews or mini-reviews.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
