Special Issue

Advances in Energy System Synthesis and Energy-Water Nexus in Industry

Message from the Guest Editors

This Special Issue aims to create novel advances in the development and application of computational methodology to address longstanding challenges in energy system synthesis and the water–energy nexus. Topics include, but are not limited to:

- Industrial energy system synthesis/optimization;
- Industrial water system synthesis/optimization;
- Advances in the water-energy nexus; and
- Application of new methods/models/algorithms in the water-energy nexus.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
