

Special Issue

Applications of Fault Diagnosis and Failure Prognosis of Dynamic Systems

Message from the Guest Editors

This Special Issue seeks original scientific contributions on novel methods/algorithms for the health monitoring (fault diagnosis and failure prognosis) of dynamic systems that may be of a theoretical and/or applied nature. Suitable topics for this Special Issue may include, but are not limited to: fault detection and system supervision.

- Health monitoring of multi-energy systems.
- Prognostics and prediction of remaining useful life (RUL).
- Model-based or hybrid, i.e., integrated model-based and data-based diagnostics and prognostics.
- Data-driven, model-based, or hybrid methods for industrial maintenance.
- Machine learning and data mining methods for system/component prognostics.
- Integrated diagnostics and prognostics architectures.
- Algorithms for health assessment and prognosis based on multiple sensor data.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
