Functional Foods and Bioactive Compounds through Environmentally Benign Emerging Processes

Message from the Guest Editors

This Special Issue on “Functional Foods and Bioactive Compounds through Environmentally Benign Emerging Processes” aims to accumulate advanced environmentally friendly processes for the development of functional foods and bioactive compounds. Topics include, but are not limited to:

- Functional foods through advanced thermal and non-thermal processes;
- Functional foods through enzyme- and microbe-associated processes;
- Bioactive compounds from agri-food waste;
- Functional foods through the modification of conventional foods;
- Functional foods through the supplementation of bioactive compounds in conventional items;
- Process intensification for the development of functional foods and bioactive compounds.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
