Application of Fuzzy Control in Computational Intelligence

Message from the Guest Editors

This Special Issue on “Application of Fuzzy Control in Computational Intelligence” aims to curate novel advances in the development and application of fuzzy control in computational intelligence to address challenges in artificial intelligence and automation technology. Topics include, but are not limited to the following:

- Development of novel fuzzy control technology;
- Soft computing applications with fuzzy control;
- Hybrid fuzzy control combined with intelligent computing methods;
- Theory and application of fuzzy control for intelligent systems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
