Multifunctional Hybrid Materials Based on Polymers: Design and Performance

Message from the Guest Editors

The main objective of this interdisciplinary Special Issue of *Processes* is to bring together, at an international level, high-quality elegant collection of reviews, original articles, and short communications dealing with polymeric hybrid materials within different areas such as the following:

- Biomaterials chemistry, physics, engineering, and processing
- Polymer chemistry, physics, engineering, and processing
- Organic chemistry
- Composites science
- Colloidal chemistry and physics
- Porous nanomaterials science
- Energy storage
- Automotive and aerospace manufacturing

All the articles submitted to the Special Issue will undergo a thorough review process. This editorial will interest the broadest possible section of readership among materials scientists and engineers.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy
