

## Special Issue

# Hydrogen Production Technologies

### Message from the Guest Editors

This special issue on “Hydrogen production technology” aims to gather outstanding researches and the comprehensive coverage of all aspects related to the hydrogen production technology, covering a wide range of technologies to produce hydrogen from a variety of resources and technologies in both economically and environmentally friendly ways. This special issue will bring together high-quality research articles on the different aspects of hydrogen production technology including current status and remaining challenges. Topics include, but not are limited to:

- Hydrogen production technologies, including chemical and biological processes
- Theoretical and experimental investigation for hydrogen production process design
- Integrated process development relating to the production of hydrogen and its utilization

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
