Special Issue

Advanced Methods in Process and Systems Engineering

Message from the Guest Editors

This Special Issue aims to foster the interplay between theory and application in the field of Process Systems Engineering. Main areas of interest are:

- Systems engineering: new theoretical concepts and tools for modeling, analysis, design, control and operation of complex process systems
- Advanced process systems for renewable energy conversion; biotechnological production; production & separation of active pharmaceutical ingredients

The special issue is motivated by the 1st International Young Professionals Conference on Process Engineering (YCOPE), held in Magdeburg, Germany, on March 18-20, 2019, which adressed the outlined challenges.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
