# Advances in Microfluidics Technology for Diagnostics and Detection

### Message from the Guest Editors

This Special Issue on “Advances in Microfluidics Technology for Diagnostics and Detection” aims to gather outstanding research and carry out comprehensive coverage of all aspects related to microfluidics in diagnostics and detection. Topics include but not are limited to the following:

- Microfluidics technology and lab-on-a-chip for point-of-care (medical) and point-of-use (environmental) testing;
- Integration of embedded systems with lab-on-a-chip for enhanced diagnostic testing;
- Addressing the challenges of applying microfluidic technology to diagnostics (micro-fabrication, sensitive detection, surface treatments, etc.);
- New diagnostic tests enabled by microfluidic phenomena.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
