

Special Issue

Modeling and Control of Distributed Complex Dynamic Systems

Message from the Guest Editor

This Special Issue provides a platform for researchers to present their latest investigation results on modeling approaches and techniques for the control of distributed complex dynamic systems, and to report critical issues and challenges for future research. Topics of interest include, but are not limited to, the following areas:

- Novel and effective methods on modeling complex dynamic systems;
- Stability analysis and stabilization strategies for complex dynamic systems;
- Security control for networked complex dynamic systems;
- Data-driven modeling, control and optimization for networked complex dynamic systems;
- Model-based control design and verification for networked complex dynamic systems;
- Analysis of decision optimization problems in complex processes;
- Practical application-oriented system design for complex dynamic systems;
- Modeling and control of complex dynamic systems with time delays.

Guest Editor

Prof. Dr. Zhou Gu

School of Mechatronics Engineering, Nanjing Forestry University,
Nanjing 210037, China

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
