

Special Issue

Advanced Multiple Criteria Decision-Making Methods for Novel Applications

Message from the Guest Editors

The effectiveness of MCDM methods becomes even more important when decisions are made by machines or robots with less human involvement because identifying the true preferred alternative is the most difficult part of validating MCDM methods. To further accomplish next-generation artificial intelligence, this Special Issue aims to develop advanced MCDM with novel applications in a direction of research that continues to remain relevant. Relevant novel applications using MCDM methods include (but are not limited to) the following:

- Advanced MCDM methods
- Novel applications of MCDM methods
- Novel algorithms for MCDM with novel applications
- Relevant group MCDM methods with novel applications
- Validation, effectiveness, consistency, efficiency issues of MCDM/GMCDM methods

Guest Editors

Prof. Dr. Jei-Zheng Wu

Department of Business Administration, Soochow University, Taipei, Taiwan

Prof. Dr. Chia-Yen Lee

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
