

Special Issue

Advances in Nanomaterials for Selective Adsorption

Message from the Guest Editor

This Special Issue on “Advances in Nanomaterials for Selective Adsorption” will collect high-quality works focusing on the latest advances on nanomaterials application for selective adsorption of inorganic and organic species from water. This Special Issue is expected to present studies on fundamental physical-chemical aspects of adsorption, as well as on nanomaterials synthesis, characterization, and surface modification for obtaining selectivity. Applicative works, involving the use of nanomaterials for the treatment of real samples, are also welcome. Topics include, but are not limited to:

- Selective adsorption of heavy metal ions and other inorganic species for water treatment;
- Adsorption of persistent organic pollutants;
- Adsorption of pharmaceutical drugs
- Adsorption and recovery of precious metals;
- Thermodynamic aspects of adsorption from solutions on nanomaterials;
- Computational modelling of surface–solute interactions

Guest Editor

Dr. Andrea Melchior

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
