

## Special Issue

# Machine Learning Methods for Modelling Neurological Diseases

### Message from the Guest Editors

For this Special Issue, we seek research that demonstrates the application of Machine Learning methods in the modelling of neurological disorders, spanning from neurodevelopmental to neurodegenerative and age-related disorders. Potential

topics include (but are not limited to):

- Machine Learning approaches in neurodevelopmental disorders
- Machine Learning approaches in neurodegenerative disorders
- Machine Learning in aging and age-related disorders
- Machine Learning in neuromuscular diseases
- Machine Learning in the diagnosis of neurological disorders

- Multimodal data collection and analysis
- Data fusion in neurology
- Hardware and software integration
- Health and care applications

---

### Guest Editors

Dr. Alessandro Tonacci

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
