

Special Issue

Recovery, Regeneration, and Reutilization Insights Related to New-Generation Solvents

Message from the Guest Editors

This Special Issue on “Recovery, Regeneration, and Reutilization Insights Related to New-Generation Solvents” aims to collect high-quality research articles addressing recovery, regeneration, and reutilization studies or similar works, including comprehensive review studies in well-explored topics with special general interest. Processes at which recovery, regeneration, and reutilization of new-generation solvents take place can be but are not limited to the following: - Recovery and reuse of new-generation solvents in homogeneous reactions; - Extraction and extractive distillation processes using new-generation solvents; - Absorption and valorization of greenhouse gases using new-generation solvents; - Biomass pretreatment and fractionation with new-generation solvents; - Different lab scale uses for specific new-generation solvents.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
